INSTRUCTIONS FOR USE — EN

ANSELL CHEMICAL RESISTANT GLOVES CR (MODULE D) VERSION

A. Use

Read & Understand: Before the user is to be used in combination with the specific information that is mentioned on or inside each packaging enclosure. These gloves are designed to protect the hands mainly against chemical risks and comply with the applicable harmonised EN or EN IEC Standards as shown by the pictograms being mentioned on the gloves or packaging enclosures. The gloves therefore will provide protection against the specific risks as shown by these pictograms, when used in accordance with the instructions mentioned in these instructions for use. Gloves that are CE marked as PPE Category III are subject to the European Regulation 2016/425 and are in conformity with the European Regulation 1907/2006 and 2016/425, incorporated with the requirements of the harmonised standards listed with this leaflet, are also in conformity with the European Regulation 1935/2004 and 2023/2006 as well as with all applicable National Regulations for food contact materials. Please ensure the gloves are used only for the designated purposes, as explained above.

Explanation of symbols & pictograms:

Protection against heat
Flammability (level 1 to 4)
Contact heat (level 1 to 4)
Convective heat (level 1 to 4)
Radiant heat (level 1 to 4)
Small sample burn of molten metal (level 1 to 4)
Large quantities of molten metal (level 1 to 4)
Protection against cold
Protection against chemicals
Protection against micro-organisms
Protection against mechanical risks
Abrasion resistance (level 0 to 4)
Blade cut resistance (level 0 to 5)
Tear resistance (level 0 to 4)
Puncture resistance (level 0 to 4)
Sleeve resisting four mechanical risks (level 0 to 4)
Protection against ionising radiation and radioactive contamination
Protection against electrostatic charges
Protection against vibrations
Protection against hand, foot and leg injuries
Protection against slipping on a wet surface
Protection against slipping on an oily surface
Protection against slipping on a snowy surface
Protection against slipping on a frozen surface
Protection against slipping on a wet surface and on an oily surface
Protection against slipping on a wet surface and on a snowy surface
Protection against slipping on a wet surface and on a frozen surface
Protection against slipping on an oily surface and on a snowy surface
Protection against slipping on an oily surface and on a frozen surface
Protection against slipping on a snowy surface and on a frozen surface
Protection against slipping on a wet surface, on an oily surface and on a snowy surface
Protection against slipping on a wet surface, on an oily surface and on a frozen surface
Protection against slipping on a wet surface, on a snowy surface and on a frozen surface
Protection against slipping on an oily surface, on a snowy surface and on a frozen surface
Protection against slipping on a wet surface, on an oily surface, on a snowy surface and on a frozen surface
Type 1 = chemical breakthrough time > 30 minutes against at least 6 chemicals as per its letter
Type 2 = chemical breakthrough time > 30 minutes against at least 3 chemicals as per its letter
Type 3 = chemical breakthrough time > 10 minutes against at least one chemical as per its letter
a = methanol
b = acetone
c = acetonitrile
d = dichloromethane
e = carbon disulfide
f = toluene
g = diethylamine
h = tetrahydrofuran
i = ethyl acetate
j = n-heptane
k = sodium hydroxide, 40%
l = sulphuric acid, 96%
m = nitric acid, 65%
n = acetic acid, 99%
o = hydrogen peroxide, 30%
p = ammonia, 25%
Please refer to manual for more information
Please read the instructions for use before using the product
contact Ansell for more information
Suitable for contact with foodstuffs
Protective snowflake grading Nivo4S to NF
Protective snowflake grading Nivo4S to NF according to the American National Standard Institute 105-2016
Protect from sunlight
Protect from heat
Protect from cold
Protect from moisture
Product is compliant and certified to the requirements of the Russian Customs Federation
Product is compliant and certified to the requirements of the Eurasian Economic Union
Certificate of Approval, as certified by the requirements of the Korean Occupational Safety and Health Agency
Do not re-use
Do not wash
Do not dry clean
Do not iron
Do not bleach
Do not tumble dry
Do not use near heat, sparks or flames
Do not use if packaging is damaged
Do not use if product is visibly damaged
Do not use if product is visibly contaminated
Do not use if product is visibly worn
Do not use if product is visibly torn
Do not use if product is visibly punctured
Do not use if product is visibly degraded
Do not use if product is visibly discoloured
Do not use if product is visibly swollen
Do not use if product is visibly shrunken
Do not use if product is visibly stiff
Do not use if product is visibly sticky
Do not use if product is visibly brittle
Do not use if product is visibly cracked
Do not use if product is visibly hardened
Do not use if product is visibly perished
Do not use if product is visibly deformed
Do not use if product is visibly ripped
Do not use if product is visibly abraded
Do not use if product is visibly blistered
Do not use if product is visibly swollen and blistered
Do not use if product is visibly swollen and ripped
Do not use if product is visibly swollen and abraded
Do not use if product is visibly swollen and cracked
Do not use if product is visibly swollen and perished
Do not use if product is visibly swollen and deformed
Do not use if product is visibly swollen and discoloured
Do not use if product is visibly swollen and brittle
Do not use if product is visibly swollen and sticky
Do not use if product is visibly swollen and shrunken
Do not use if product is visibly swollen and stiff
Do not use if product is visibly swollen and hardened
