

- A. Vermason Dissipative Document Wallets are designed for use within ESD Protected Areas in accordance with EN 61340-5-1. Unprotected documents could hold electrostatic charges that may cause damage to electrostatic sensitive devices.
- B. The pocket provides mechanical protection to contents. Documents are inserted into the pocket, which can be clipped into a 2, 3 or 4-ring binder such as [Vermason Dissipative Ring Binders](#).
- C. Inherently static dissipative, charges removed to ground when placed on a grounded working surface or handled by a grounded operator. Dry to the touch, the pocket opens at the top. They are no stick and suitable for photocopies and fax.
- D. During normal use the Dissipative Document Wallet is low charging antistatic.
- E. They are made of polyethylene modified using durAstatic® technology. These document wallets do not contain additives that bloom to the surface or that are volatile and are therefore suitable for use in clean rooms.
- F. The spine of the pocket is reinforced and has eleven holes.

#### Film properties

Property	Value	Test Method
Material	Inherently Dissipative Polymer (IDP)	
Film thickness	90 micron	
Heat Sealable	Yes	
Colour	Transparent	
Recyclable	Yes	
Surface resistance	$R_S: 1 \times 10^5$ to $< 1 \times 10^{11}$ ohms	IEC 61340-2-3

Item	Insert Size	External Size h x w	Spine	Unit
<a href="#">238756</a>	A4 Portrait 210mm x 297mm	306mm x 233mm	11-hole	100

EN 61340-5-1 "Paperwork inside the EPA shall either be kept in containers conforming to the requirements of table 2 or shall not generate a field in excess of that specified in paragraph 5.3.5 (ESDS should not be exposed to electrostatic fields in excess of 10 kV/m)." Insulative paper, placed upon ESD protected worksurface, can easily interrupt path-to-ground.

Made in Britain

Dimension tolerance:  $\pm 10\%$
