

Soft Care™ Des E Spray

Hand disinfectant liquid

Description

Soft Care Des E Spray is an alcohol based hand disinfectant for waterless skin disinfection. Soft Care Des E Spray is suitable for use in all areas, including healthcare and food processing environments.

Key properties

Soft Care Des E Spray is a hand disinfectant based on ethanol (71.5%). Ethanol is a disinfectant which is very effective against resident and transient flora such as bacteria (e.g. MRSA) and yeast. It is also effective against enveloped viruses such as influenza and certain non-enveloped viruses such as Norovirus and Adenovirus.

Soft Care Des E Spray contains a skin softener helping the skin to remain smooth and intact, particularly in areas where frequent hand disinfection is required.

Soft Care Des E Spray is perfume-free thus eliminating the risk of tainting foods, and making it suitable for application in the food processing area.

Soft Care Des E Spray has a low viscosity, making it suitable for application through a wide range of hygiene devices.

Benefits

- Contains ethanol, a highly effective disinfectant
- Suitable for surgical disinfection
- Fragrance and colour-free; suitable for use in the food processing industry
- Contains an effective moisturiser preventing skin irritation and dehydration
- Liquid format suitable for spray application

Use instructions

Apply 3ml Soft Care Des E to clean, dry hands. Rub hands thoroughly. Pay special attention to fingertips, nails and between the fingers. Rub for 30 seconds and allow hands to air dry.
