Date: 08 July 2015

Cementone SBR
STRENGTHENS & WATERPROOFS CONCRETE & MORTAR

YOUR SMART ADVANTAGES

- Toughens floors and screeds
- Superior water, chemical and abrasion resistance
- For waterproof rendering, flooring, tanking, bedding, pointing etc.

USES

Bostik SBR (formerly known as Cementone SBR) is a specially modified Styrene Butadiene Co-polymer Latex for cement and mortar. It toughens, waterproofs and improves chemical and abrasion resistance of renders, screeds and other cement based mixes. Bostik SBR is an excellent all round primer and bonding agent especially suitable for external applications.

Bostik SBR can be used for pointing, patching, bedding, waterproof rendering, tanking and flooring and for bonding renders and suction control.

TYPICAL PERFORMANCE DATA (Approx.)

| Mix Ratios | Mix Ratio is dependent on application being carried out. See the relevant application section for details. |

DIRECTIONS FOR USE

IMPORTANT: Before using Bostik SBR refer to the relevant Health & Safety Data Sheet, available at www.bostik.co.uk.

PREPARATION

1. Wear gloves and suitable eye/face protection.
2. Ensure surfaces are sound, clean, dry and free from grease, oil, paint, laitance and loose materials.
3. Key surface by scabbling, vacuum grit blasting or planing.
4. Ensure the working temperature is above 5°C.
5. For all applications, dampen porous surfaces before applying the appropriate Bostik SBR Bonding slurry.
6. Sands must be well graded, clean and meet the appropriate British Standards.
7. Aggregates must be dust-free.

APPLICATION

This product has been designed to work with Portland cement: CEM I and Portland-fly ash cement: CEM II/B-V. For other types of cement e.g. Portland-limestone CEM II / A-LL it is recommended that a small trial is carried out to ascertain the optimum mix ratios as these cement types and sand can vary.
IMPORTANT: Work should not be carried out at temperatures below +5°C or when temperatures are expected to fall below this. Ensure materials and procedures comply with the appropriate British Standards. Do not exceed ratios stated. Do not overmix. Do not use with other admixtures. Do not add to lime based mixes. Do not use with high alumina, sulphate resisting or extra rapid hardening cement.

**Bonding Slurry:** For screeds, toppings, renders and coatings.

8. Mix 2 parts cement to 1 part Bostik SBR by volume to a stiff brushable consistency. Do not add water.

9. Apply evenly to dampened surface to a nominal thickness of between 1mm and 2mm.

10. Apply screed, topping, render or coating while the slurry is tacky (this normally takes 20 to 40 minutes).

Please note the following recommendations are for guidance only and do not constitute a specification.

**Floor Toppings and Screeds:**

11. Mix and apply the following mix designs dependent on thickness required:

<table>
<thead>
<tr>
<th>Thickness</th>
<th>By Weight</th>
<th>By Volume</th>
</tr>
</thead>
<tbody>
<tr>
<td>&lt;12mm</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Cement</td>
<td>25 kg</td>
<td>1 part</td>
</tr>
<tr>
<td>Sand</td>
<td>62.5 kg</td>
<td>2 parts</td>
</tr>
<tr>
<td>Bostik SBR</td>
<td>5 litres</td>
<td>SBR: Water = 1:1 Water 5 litres</td>
</tr>
</tbody>
</table>

12. 5 litres of water is recommended for dry sand mixes. If sharp washed sand is wet, reduce water quantity accordingly.

13. Keep mix just wet enough to obtain good compaction. Finish quickly with a steel trowel.

**External Waterproof Renders Above Ground:**

14. Apply bonding slurry, stipple to provide a key and allow to dry.

15. Then apply second bonding slurry coat at right angles to the first, stipple to provide a key.

16. Apply render mix while second slurry coat is still tacky.

</tr>
</tbody>
</table>

17. 5 litres of water is recommended for dry sand mixes.

18. Apply 2 – 6mm render coats allowing no more than 8 hours between coats. If longer, apply a bonding slurry between coats.

19. Prevent from drying out during the first 48 hours by covering with polythene or mist spraying with water when initially firm.

**Other Applications**

**Suction Control:**

20. Mix 1 part Bostik SBR to 4 parts water. Brush on to surface and allow to dry.

**Concrete Repair:**

21. If steel reinforcement is exposed, wire brush or grit-blast to remove rust and scale.

22. Prime exposed steel using a bonding slurry. Allow to dry.

23. Dampen surrounding concrete. Then apply another bonding slurry over entire area (including reinforcing) to be repaired.

24. Apply the following mix while the bonding slurry is still wet:

<table>
<thead>
<tr>
<th>By Weight</th>
<th>By Volume</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cement</td>
<td>25 kg</td>
</tr>
<tr>
<td>Sand</td>
<td>62.5 kg</td>
</tr>
<tr>
<td>Bostik SBR</td>
<td>7.5 litres</td>
</tr>
<tr>
<td>SBR: Water = 3 : 1</td>
<td>Water 2.5 litres</td>
</tr>
</tbody>
</table>

25. 2.5 litres of water is recommended for dry sand mixes. If sharp washed sand is wet, reduce water quantity accordingly.

**Pointing:**

26. Apply bonding slurry into dampened joints. Prime a small area at a time to avoid bonding slurry from drying out before pointing is completed.

27. Point joints with above mix, while bonding slurry is still wet.

**Cleaning:**

28. Clean tools and equipment immediately after use with water.

**Precautions in Use**

This product has been designed to work with Portland cement: CEM I and Portland-fly ash cement: CEM II/B-V. For other types of cement e.g. Portland-limestone CEM II / A-LL it is recommended that a small trial is carried out to ascertain the optimum mix ratios as these cement types and sand can vary.

IMPORTANT: Work should not be carried out at temperatures below +5°C or when temperatures are expected to fall below this. Ensure materials and procedures comply with the appropriate British Standards. Do not exceed ratios stated. Do not overmix. Do not use with other admixtures. Do not add to lime based mixes. Do not use with high alumina, sulphate resisting or extra rapid hardening cement.
For any application not covered please contact Technical Services on +44 (0)1785 272625 or visit www.bostik.co.uk for advice.

Recommendations and suggestions are for guidance only, since conditions of use are completely beyond our control.

For health and safety instruction, first aid measures and spillage and disposal instructions, see separate Health and Safety Data sheet for Bostik SBR, available at www.bostik.co.uk.
This disclaimer is issued by Bostik Limited ("the Company") and applies to the use of any products supplied by the Company ("the Products") displayed on this Technical Data Sheet ("TDS"). Please read this disclaimer carefully before using any of the Products. Using this TDS and/or the Product constitutes your acceptance of this disclaimer. Its contents shall prevail over any directions of use and any disclaimer and/or exclusion or limitation of liability of the Company which may appear on the packaging of the Products.

This disclaimer sets out the entire financial liability of the Company (including any liability for the acts or omissions of its employees, agents and sub-contractors) to any user of the Products ("Product User") in respect of any use made or resale by the Product User, of any of the Products in this TDS.

This disclaimer does not affect the Company’s liability for death or personal injury arising from the Company’s negligence in respect of the Products, nor its liability for fraud, or fraudulent misrepresentation, nor any other liability which cannot be excluded or limited under applicable law.

The Company’s total liability however arising and whether caused by tort (including negligence and breach of statutory duty), breach of contract or otherwise, arising in connection with the use made or resale by the Product User of any of the Products in this TDS shall be limited to the price paid for the Product by the Product User.

The Company shall not be liable to the Product User for any pure economic loss, loss of profit, loss of business, depletion of goodwill or otherwise, in each case whether direct, indirect or consequential, or any claims (including in respect of personal injury insofar as not caused by the Company’s negligence) for consequential compensation whatsoever (howsoever caused) which arise out of or in connection with the use made or resale by the Product User of any of the Products in this TDS.

The Company shall not be liable to the Product User in relation to any loss for any use which is inappropriate or use which is otherwise than in accordance with the relevant instructions for use of the Products in this TDS or on the Product. Product Users are advised to confirm the suitability of the Products by their own tests.

This TDS covers just one of a large range of products supplied by the Company.

Full information on these products and advice on application is freely available from our fully trained staff throughout the country. In addition, specialist technical advice is available from our Technical Services Department. This TDS supersedes all previous TDSs relating to the Products, and users of it must ensure that it is the current issue. Destroy all previous TDS, and if in any doubt, contact the Company, quoting the code number in the top right hand corner on the front of this document.
